

# Project Engineer

## ABOUT CLARUM HOMES

Clarum Homes is a green builder in Silicon Valley. We build passive and high-performance homes that are healthier for your family and our planet. Clarum has built multi-family construction projects and affordable housing communities. We are specialists in LEED-certified new custom homes. Clarum has a relentless commitment to home-building innovation. This means blending unsurpassed energy-efficient technology and sustainable building materials with homes that are gorgeously designed, and amazingly comfortable. At Clarum Homes, we lead the way in home innovation!

Our Mission is **Transforming the Way You Live,**” and we aim to hire team members who are in alignment with our vision and values. Our core values inform every decision we make, day in and day out:

- Live Innovation
- Create Healthy Environments
- Transform Home Building
- Be Transparent and Authentic

If you are an “A” player and think you might be a good fit, we want to hear from you!

## JOB SUMMARY

We are searching for a talented and successful Project Engineer who wants to be a part of significant construction projects in the SF Bay Area. You will have the opportunity to work on landmark projects that you will be proud of.

Reporting to the Vice President of Field Operations, the Project Engineer will be responsible for participating in many facets of the construction process such as submittals, project schedules, meetings, job safety, and maintain all logs and punch lists. This role will be involved from the beginning of the construction process through end.

**Job Requirements:**

- Minimum two years' experience as a Project Engineer with on-site project supervision
- New Construction experience:
  - Wood frame, concrete tilt-up, concrete poured in place/stressed, podium, steel frame, one to five story construction
- Seismic and structural retrofit experience:
  - URM retrofit, concrete structure, steel structure, wood structure
- Must be proactive and can take initiative
- Ability to manage multiple projects simultaneously
- Strong organization and communication skills
- Ability to work within a team environment and meet project milestones on time
- Timely communicate information among all project team members including owners
- Provide any additional support required for successful completion of the project
- Recognize, report, and solve problems in a creative, positive, and constructive way

**Personal Skills Required:**

- Excellent communication skills, verbal and written
- Listening skills
- Problem solving skills
- Time management skills
- Crisis management skills
- Teamwork and relationship building skills
